## A crucial design exploration on our sustainable journey

Sustainability is at the heart of our design process. With Sia we've managed to drive the virgin plastic used in the structural elements of the chair down to just 30%. The remaining 70% is recycled plastic, 43% being post-consumer. As well as cutting the embedded carbon in the finished piece, our approach helps the planet by absorbing plastic waste.

Moving towards a circular manufacturing model, Sia uses fewer components than most task chairs and is assembled without adhesives. This makes replacing damaged parts more feasible, extending Sia's longevity while also making it easier to separate and reuse or recycle components at the end of its lifecycle.

Post Consumer Recycled Plastics **43.1%**

Recyclable Content **99.4%**

Total Recycled Content **70.6%**

Total Carbon Footprint

**SIA/5**  
**Cloud Mesh**  
**100% Recycled Yarn**  
Textured Mesh in 8 Colours

## SIA 5 - Cloud Mesh

---

### Net gains

---

Sia is available with a 3D knitted mesh in eight colours to suit your scheme or colour ways. The Cloud mesh reduces waste as the back will be knitted precisely to the chair's form rather than cut from a roll.

Going further, the mesh is made from SEAQUAL® YARN 100% post consumer recycled content - made from old fishing nets and sea-borne waste plastic, for example.

## SIA 4 - Fizz Mesh

---

### Organic lines

---

Sia's environmentally friendly credentials are matched by her soft, flowing aesthetic. Our designers are challenging the status quo with gentle, organic curves. Every profile has been considered to shape a lighter look and feel, augmented by the colour options available.

Sia has design longevity – a work chair that brings an enticing, calming element to workplace transforming task areas into destination spaces.

SIA 4 - Fizz Mesh

---

## SIA 3 - Duo Mesh

---

### Maximum comfort and support

---

Our design team worked closely with leading ergonomist Levent Çağlar at FIRA while developing Sia, resulting in a task chair providing optimum comfort and support.

With the right amount of flex and twist in the back section, Sia moulds to the human form, providing lumbar support without restricting movement. Its generous high back, a lumbar pad that is adjustable across a 100mm range, and multi-adjustable armrests make Sia customisable to a wide variety of body shapes and sizes.

This is a chair built for maximum comfort, concentration and focus, facilitating wellbeing and productivity in the workplace.

### Greener from top to bottom

---

Sia can even be specified with castors made from seed oil instead of petrochemical-based plastics. Throughout the design, we've included options to incrementally boost Sia's sustainability credentials. Whereas castors are typically made from high-carbon impact materials, this plant-based alternative gives customers the opportunity to drive the chair's overall environmental impact down even further.

### SIA 2 - Knitted Mesh

---

---

SIA 1 - Gabriel Runner

---

#### Our most sustainable chair yet

---

Sustainability is at the heart of our design process. With Sia we've managed to drive the virgin plastic used in the structural elements of the chair down to just 30%. The remaining 70% is recycled post-consumer plastic. As well as cutting the embedded carbon in the finished piece, our approach helps the planet by absorbing plastic waste.

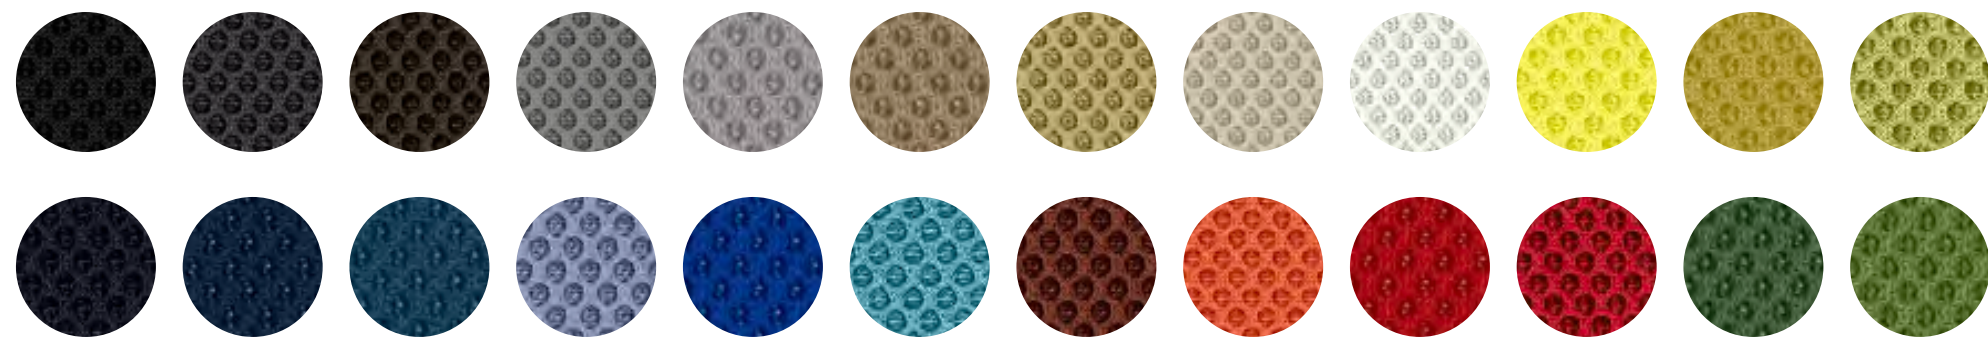

Moving towards a circular manufacturing model, Sia uses fewer components than most task chairs and is assembled without adhesives. This makes replacing damaged parts more feasible, extending Sia's longevity while also making it easier to separate and reuse or recycle components at the end of its lifecycle.

Colour Options

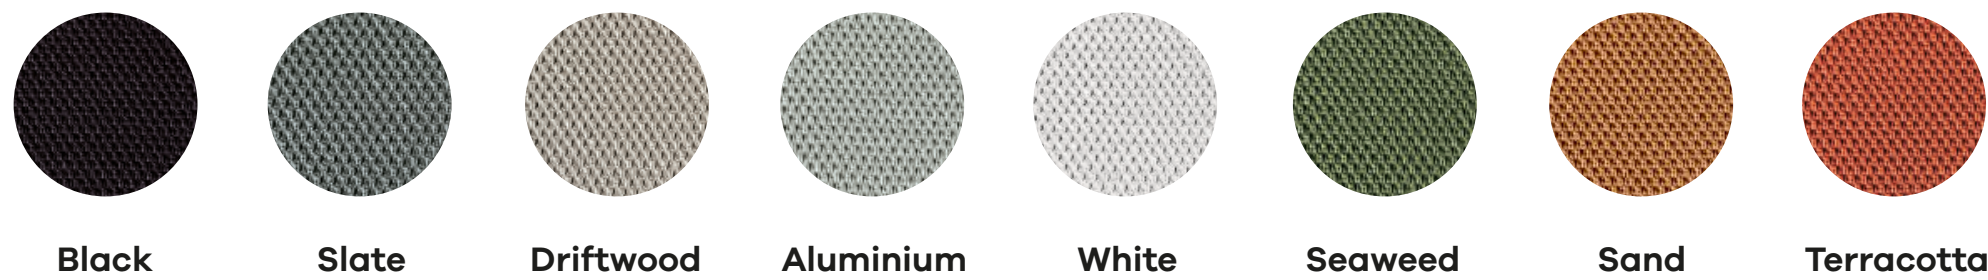

## SIA/1

Gabriel Runner 24 Colours

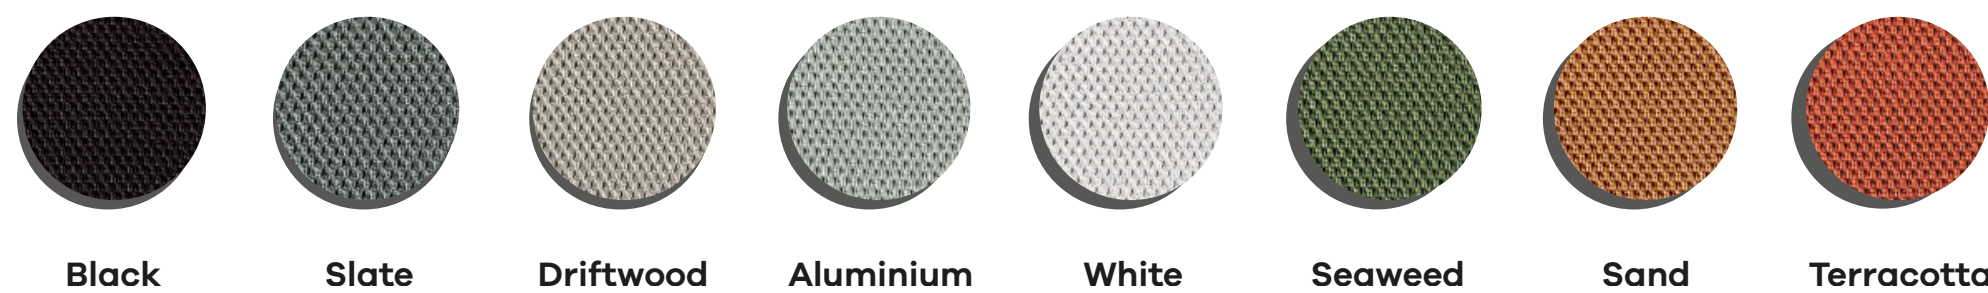

## SIA/2

Knitted Mesh - 100% Recycled Yarn - 8 Colours

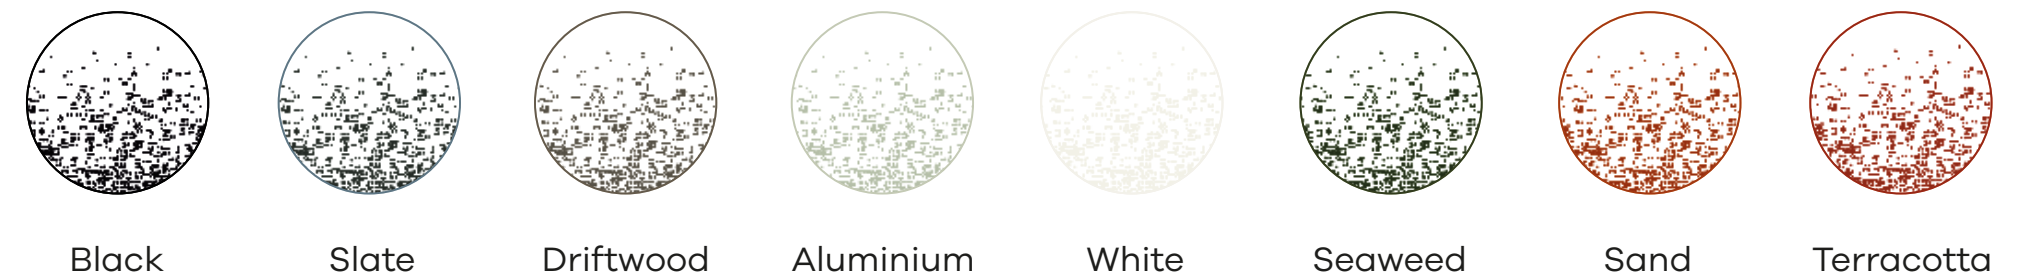

## SIA/3

Duo Mesh - 100% Recycled Yarn - 56 colour combinations

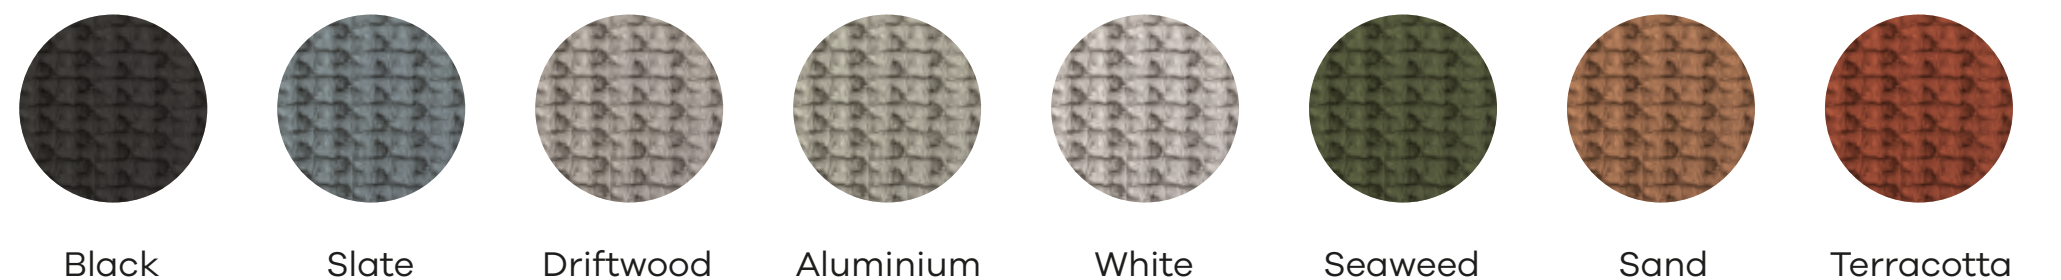

## SIA/4

Fizz Mesh - 100% Recycled Yarn - 56 colour combinations

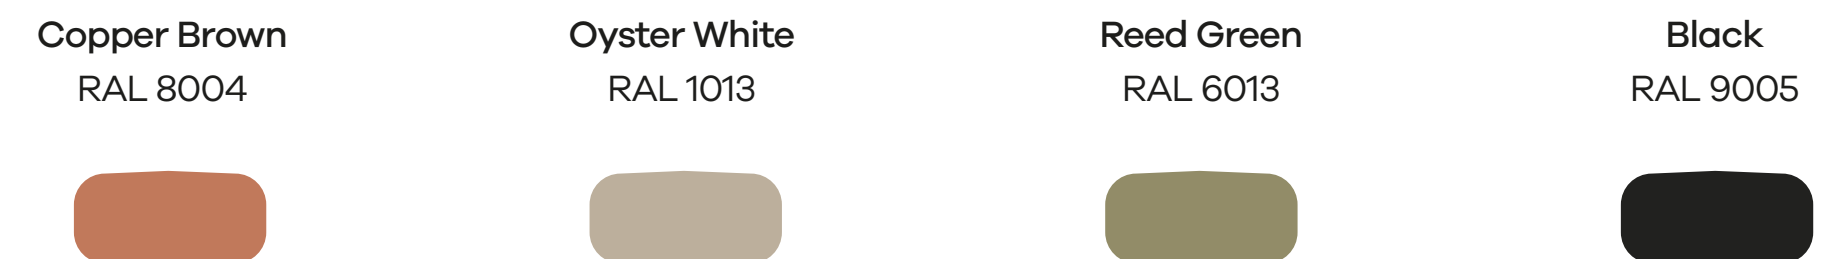

## SIA/5

Cloud Mesh - 100% Recycled Yarn - Textured Mesh in 8 Colours

## Frame & Lumbar

# Sia

## Features

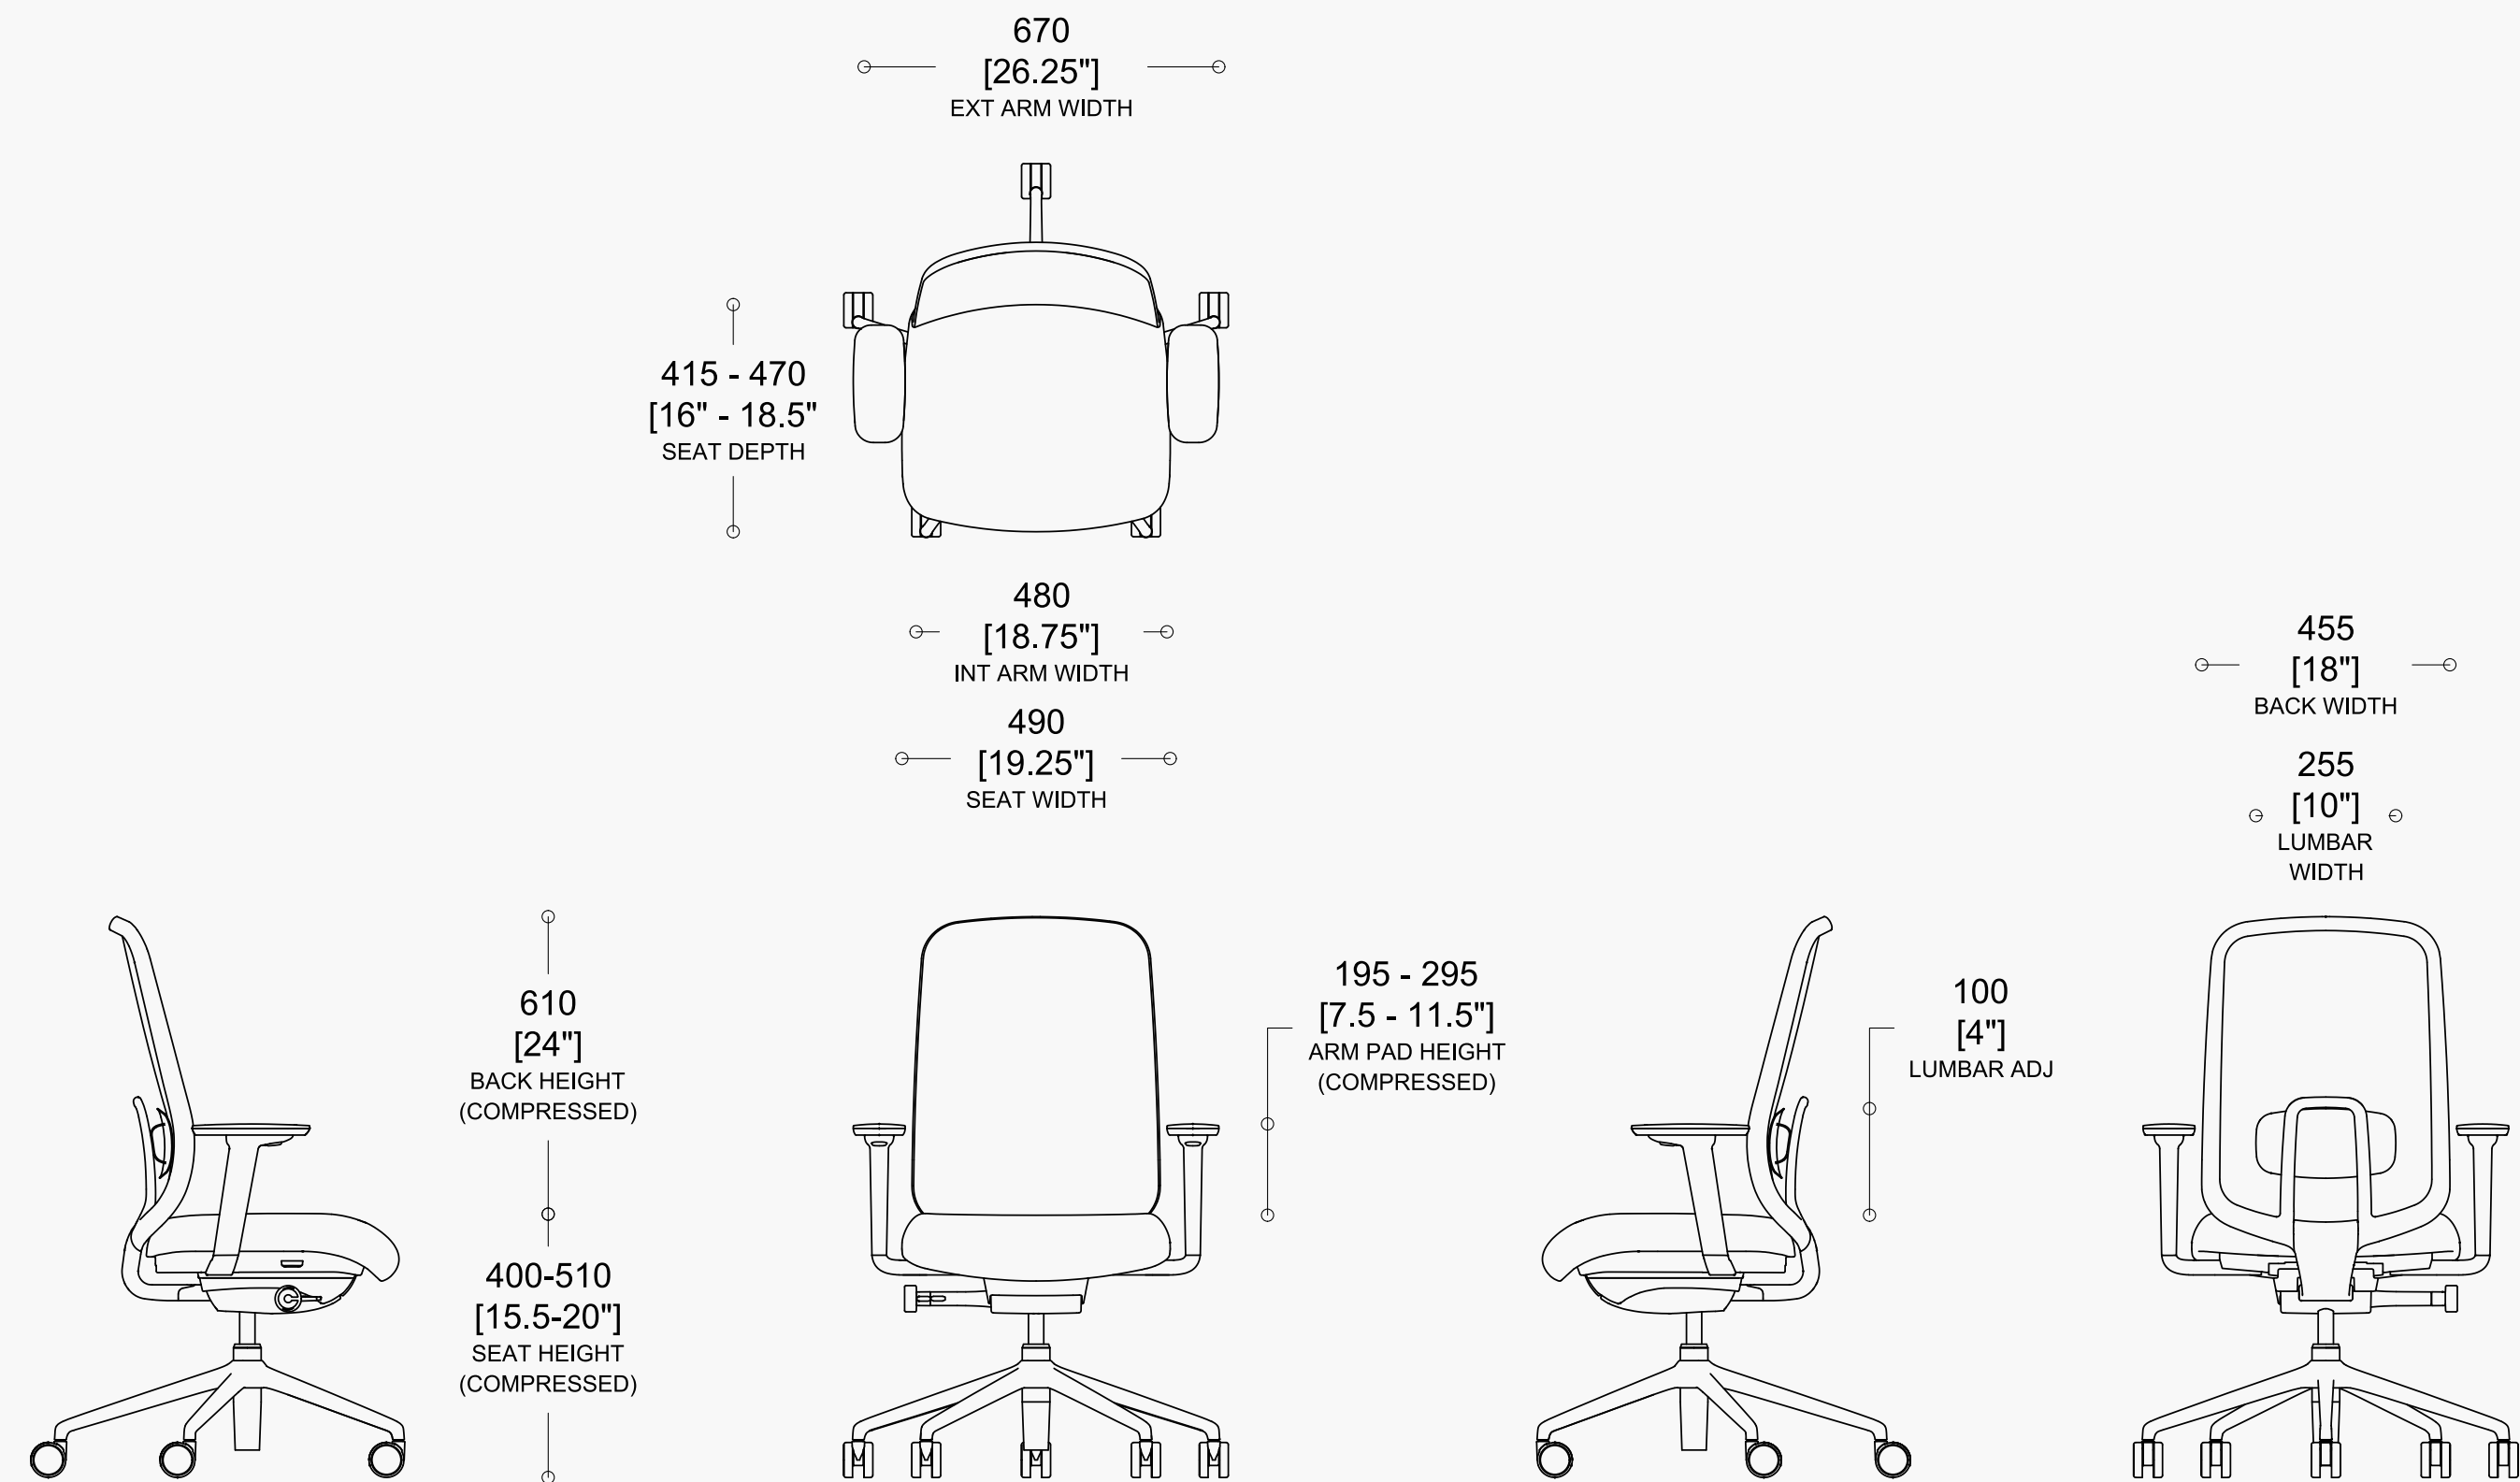

### Features

- 4 Colours back frames & lumbar; Black, Copper Brown, Reed Green, Oyster white,
- 24 Gabriel Runner mesh colours
- 8 Recycled mesh colours
- 56 Recycled mesh Duo configurations
- 56 Recycled mesh Fizz configurations
- 8 Recycled mesh colours - Cloud textured
- 100mm lumbar height adjustment
- Back lock in 3 positions
- 55mm seat depth adjustment
- 120mm seat height adjustment
- Intuitive weight-balance mechanism with additional tension adjustment
- Black Nylon five-star base with black castors

### Additional Options

- Black Multifunctional Arms with arm pads
- Polished five-star base
- Silver Castors

### Dimensions

Weight: 14.3kg
