Technology offers designers the tools to create new, freer and more creative shapes. Karbon is the expression of creativity, knowledge and technology. It is a product that provokes positive sensations when it is interacted with, as well as admiration, for having achieved the end result. It is an object of desire with an interesting emotional relationship.

NOT
EVERYONE
IS ABLE TO
FEEL IT

Not everyone is able to feel it. So, if you are lucky enough to do so, go ahead: feel it. Enjoy it. Let your sensitivity, that gift that only a few possess to appreciate beauty in all its forms, textures and materials, thrill you yet again.

100 % CARBON FIBER

ACTIU
UNLIMITED

KARBON is the ACTIU chair designed and handcrafted for those capable of getting excited about design in every way.

And no, it's not for everyone.

Of course it's not.

FEEL THE
CARBON.
TOUCH
THE FIBRE.

KARBON is ACTIU's disruptive chair. A commitment to designing a collector's piece of furniture with shapes that only carbon fibre allows for. One piece that stands out in spaces open to being at the forefront.

Made from carbon filaments that are usually woven into a fabric, carbon fibre is often coated with resin or thermoplastics to create composites with a very high strength-to-weight ratio. The result is a material that is five times stronger and five times lighter than steel, as well as being twice as rigid, that can easily withstand heat and corrosion; perfect for extreme environments.

AS HARD AS
STEEL.
AS LIGHT AS
PLASTIC.

A CHAIR THAT
TAKES 45 DAYS
TO MAKE.
AN ICON TO BE
ENJOYED FOR A
LIFETIME.

Manual. This is the Karbon manufacturing process. A slow and painstaking process that requires the patience that characterises only the most meticulous artisans.
